

Please do not allow the replacement of local FM translators with Low Power FM (LPFM) stations.

I listen to K-LOVE radio almost exclusively while at home, at work, commuting and while travelling. K-LOVE provides meaningful programming which I enjoy along with national, international and some local news. The programming is wholesome, clean and uplifting. There are no advertisements which I consider a strong benefit.

I believe that if K-LOVE is displaced by a LPFM it will be a great loss to the local community. Not only would the wholesome, clean, encouraging and uplifting programming be lost and advertising be added, but the community services they offer (such as prayer ministry, and local event announcements) would not be available to us listeners.

The service provided by K-LOVE benefits a large segment of the community that listens to Christian radio, and brings a needed balance to our local radio programming.

Thank you.
